Professional Experience

Computer Technician

Dec 2015 – Jul 2017

Ronnie Hek LTD

- Ensured optimal performance of computer hardware, including PCs, laptops, and peripherals.
- Implemented hardware and software upgrades, reducing system downtime by 20%.
- Diagnosed and resolved hardware and software issues across various equipment, achieving a 25% decrease in IT support tickets.

Shop Manager / Bookkeeper

Feb 2018 – Jun 2023

The Green Shop LTD

- Managed customer orders and inquiries, providing efficient support.
- Oversaw financial aspects using Quickbooks for accurate bookkeeping.
- Led staff training and took charge of IT support, acquiring and training staff on new systems.

Projects

Space Invaders

- Created a 1978 classic Space Invaders clone, showcasing proficiency in JavaScript.
- Implemented a canvas element for the game window, demonstrating hands-on development skills.
- Self-learned and fixed bugs, showcasing problem-solving and independent learning abilities.

Face Recognition

- Developed a React app for face detection, enabling user sign-up and image submission.
- Designed a REST API using Node.js, Express.js, and Clarifai API, with data management in a PostgreSQL database.
- Implemented user entry count tracking, emphasizing full-stack development expertise.

The Smile | Band E-commerce Website

- Engineered a React-based mock band e-commerce app for a seamless user experience.
- Utilized hooks and state management to create a single-page site with optimal performance.
- Integrated features like cart item state persistence and payments with the Stripe platform.
