PERSONAL PROJECTS

(can be seen at kyle-hek.onrender.com)

Space Invaders

- Created a clone of the 1978 classic Space Invaders.
- Implemented a canvas element that acts the game window.
- Learnt a lot about classes and scope in Javascript.
- Had to self learn a lot of the code and fixed any bugs the project had.

Face Recognition

- React app that allows users to sign up and submit images for face detection while keeping track of a users entry count.
- Designed REST API using Node.js, Express.js, Clarifai API; with data stored & queried from a PostgreSQL database.

The Smile | Band Website

- Developed a mock band e-commerce React app.
- Used my knowledge of hooks and state to provide a seamless user experience all in a single page site.
- React router managed all site paths for website performance.
- Implemented cart item state persistence in the browser cache.
- Integrated payments with the Stripe payment platform.
